EXPERIENCE

- **Clarika Software + Innovation**

Ssr. Software Developer

DAC - Canada

Nov 2021 – Present

- **Lanchpad:** Contributed to the upgrade of a significant legacy project, working on the back-end with .NET Framework and the front-end with Razor and React. I notably improved numerous reports, significantly increasing efficiency.
- **Login and Permissions System:** Actively participated in the back-end development, focused on security, employing .NET 8 and Cosmos DB for advanced user permission management.

- **PriceWaterhouseCoopers**

Ssr. Software Developer

PwC, USA

June 2020 – November 2021

- **Hub of Taxes:** Tax API project, leveraging .NET Core and Azure Cloud technologies (Azure Functions, Service Bus, Azure SQL) to create a centralized API hub for optimizing tax processes.
- **Internal CRM System:** Utilized Microsoft Razor Pages, HTML/CSS, and JavaScript for front-end, and .NET Core with SQL for back-end, enhancing user experience and system customization.

- **Accion Point Group**

Software Developer

Argentina

April 2018 - June 2020

- **Hardware Incubator:** Engineered a robust desktop agent using WinForm and .NET Framework for a hardware incubator project, enabling seamless communication via USB, TCP, and IP through the MODBUS protocol
- **Bantotal:** I led the technical integration of a core banking system, using C#, RESTSOAP APIs, working with SQL and Oracle databases to extend functionalities and enhance communication with external systems

EDUCATION

- **Universidad Tecnologica Nacional UTN FRSF**

Information Systems Engineer

Santa Fe, Argentina

- **Macagno, Technical School**

Technician in Organizational Management

Santa Fe, Argentina

HARD SKILLS

- **Lenguajes:** C# — Javascript — HTML/CSS — SQL
- **Frameworks:** NET - NET Framework – React – WEB API MVC
- **Tools:** Unit Test - ORM: Dapper/Entity Framework - Azure Cloud: Azure Functions, Service Bus

PROJECTS

- **Personal Card Page:** Personal web page using Next.js and MUI.
- **Super minihammer:** Personal app to handle daily tasks. Build as monorepo with Netxjs, NET8, Entity Framework, Docker
